Subject: Pebble Project

Marianne,  
We formally request that you please add the attached article to your file as regards the Pebble Project review by USEPA.

Although current concerns seem centered on the Pebble Mine, also note that mine claims in the basin cover about 10 times the area of the Pebble Mine. We see the potential for another Coeur d'Alene Area or Clark Fork Basin Superfund mess here in the drainage of the world's currently most productive and sustainable sockeye salmon fishery.

If you seek further information, please feel free to contact us.

Thank you,  
Robert M. Hughes
